

I started at UCSL in Watford in about 1983, interviewed by Roger Tomlinson and worked initially for Jan Penn and Fred Weil and then for Nigel Walker until the takeover.

When EDS came along and got rid of EPCA which I ran I moved to Unilever House and later into TSE where I ran the X.25 network and started up the Intranetworking product line before moving into the GM account. My last role of any note was Telecoms manager for GM Asia based in Singapore for two years.
